» HOW HITECH OPERATES

At HiTech, our team of waste management experts has extensive knowledge and experience in handling general, medical and hazardous waste, as well as resource recovery. We invest in our people to ensure that they remain current with all relevant regulations, including Hazardous Substances and New Organisms (HSNO), Land Transport Rules, Dangerous Goods, and Health and Safety in Employment Acts. HiTech has MPI accredited personnel.

Our comprehensive code of conduct and ethics, along with 24-hour monitoring of our facilities, ensure the privacy and security of all materials under our care. We strive to provide top-notch waste management services that our clients can trust.

Council licensed waste collector and facility operator

» THE PATH TO SUSTAINABILITY

As New Zealand businesses increasingly recognise the urgency of sustainability, the phrase 'reduce, reuse, recycle' has never been more important. HiTech is committed to providing safe, secure, and sustainable waste disposal solutions that combine expertise with experience.

We take a comprehensive approach to managing waste of various types, always striving to recover products for reuse and recycling without compromising security. Our team is dedicated to advancing technologies that significantly reduce the volume of business waste sent to landfills in Auckland, particularly for waste products like paper, plastic, glass, and aluminium. We focus on increasing recycling and reuse of products, and when a whole item is not recyclable, we break it down into smaller reusable components whenever possible.

With our expertise and passion, we're confident that together we can make a significant contribution to creating a more sustainable future.
